

Sulaiman Alfareeth

Full Stack Developer

+971562608464 | sulaimanalfareeth@gmail.com | Dubai, United Arab Emirates | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack developer skilled in React, Next.js, Node.js, Django, Flask, FastAPI, and SQL/NoSQL databases. Experienced in building SaaS platforms, AI-powered applications, and web apps. Focused on delivering production-ready software with clean documentation and version control. Understands UI/UX principles and DevOps procedures.

WORK EXPERIENCE

Associate Software Engineer

Dec '24 — Jun '25

Syntronics Systems

Chennai, India

- Developed & enhanced ICare CRM, a multi-tenant modular platform for scalable customer data storage, personalized and bulk messaging (WhatsApp, SMS, Email) and 3+ dashboards.
- Engineered a background worker & queue system to process bulk emails every 5 mins as cron jobs, decoupling frontend and improving UX.
- Investigated and resolved critical email deliverability issues (DMARC/domain blacklisting) and devised a reliable workaround restoring email deliverability by 100%.
- Built a custom internal dashboard for 2 clients to log and display catering enquiries in real-time, ensuring no enquiry is lost-incase if email delivery fails.
- Created an intuitive control panel for non-technical clients to update sliders, images, menus and dynamic outlet timings, improving operational efficiency by 80%.

Web Developer Intern

May '24 — Oct '24

OneYes infotech

Chennai, India

- Developed a web application for tracking company performance metrics using KPIs displayed through interactive graphs, charts, and tables to a company of 50 to 100 members.
- Developed robust RESTful API endpoints using Django REST Framework, leveraging Django ORM for efficient data modeling and querying.
- Worked with SQLite and PostgreSQL, contributing to data migration and schema restructuring tasks.

SKILLS

Frontend: React, Tailwind CSS, Next.js, TypeScript, React Native, Flutter

Backend: JavaScript, Node.js, Python, FastAPI, Flask, Django, REST API, PHP

Databases: SQL, MySQL, PostgreSQL, MongoDB, NoSQL

Tools: Git, CI/CD, Version Control, Web Hosting, Docker, Postman

Soft Skills: Communication, Leadership, Problem Solving, Teamwork, Quick Learner, Teaching

EDUCATION

Bachelor of Engineering in Computer Science, SCAD College of Engineering and Technology

Aug '20 — May '24

(GPA: 8.1)

Tirunelveli, India

PROJECTS

Smart Todo AI (Next.js, Tailwind CSS, Django, Google's Gemini API, PostgreSQL) [Link](#)

- Created AI-powered task management app delivering context-aware recommendations, task prioritization scoring, and personalized advice.

CalendarBot (Python FastAPI, Streamlit, LangChain, Google's Gemini API) [Link](#)

- Built an AI-integrated conversational assistant for Google Calendar, handles scheduling, rescheduling, and managing events on your calendar.

Video Overlay Streamer (React, Flask, MongoDB, FFmpeg, Mediamtx) [Link](#)

- Developed an RTSP video streamer with customizable overlays, presets, and dynamic text/logos for overlay streaming.

BookStore (React Native (Expo), Node.js, Postgres) [Link](#)

- Mobile app for buying and selling books with seller dashboard and order management.

AdmyBrand SaaS (Next.js, TypeScript, Tailwind CSS) [Link](#)

- Built AI-powered marketing SaaS platform with scalable UI components and dynamic features using modern frontend stack.
